

## UserWay Tutorial – Install on Drupal

<https://userway.org/platforms/drupal>

Audio	Visual
<p>Hi everyone. In this tutorial, I'm going to show you how to install UserWay widget in Drupal. You must follow all these steps to get the code snippet that you will later paste on your site. Some steps are customization options that you can actually skip and go through them later. But in this tutorial, I will show you all of the steps.</p>	<p>Woman wearing a UserWay shirt is speaking, her video is in a small box in the lower right corner of the screen. This box remains throughout the video.</p> <p>The main screen shows a page from the UserWay website</p>
<p>Now let's begin. So, visit UserWay.org and click on "Get the Widget."</p>	<p>The cursor moves to the upper right corner of the UserWay website and clicks the "Get the Widget" button next to the UserWay icon. Step 1 of the code generation questionnaire appears.</p>
<p>Step number one is, add your website address. Also, don't forget to agree to the terms of service and privacy policy.</p>	<p>The example website's URL appears in the "What's your website's address?" window. The cursor clicks the "I agree" checkbox and the "Next" button.</p>
<p>Click on "Next" to step number two. Add your name, last name, and your email. Click on "Next" to step number three.</p>	<p>Step 2 of the questionnaire appears. Sample values appear in these form windows. The cursor clicks the "Next" button in the lower right corner. The form advances to the next page. The cursor clicks the "Next" button.</p>
<p>Here you can select the icon that you to display. You choose among these four. Click on "Next" to step number four.</p>	<p>Step 3 appears. The cursor highlights the four icon choices, leaving the first (default) option selected. The cursor clicks the "Next" button.</p>
<p>Choose the size. No matter which size you choose, mobile devices will always display the smaller size. Click on "Next" to step number 5.</p>	<p>Step 4 appears, showing the two icon size choices. The cursor hovers over the smaller icon, then clicks the "Next" button, leaving the larger (default) icon size selected.</p>
<p>You can use this color picker to change the color of the button, so it matches the rest of your website. Click on "Next" to step number six.</p>	<p>Step 5 appears, showing a spectrum bar and swatch selector. The cursor clicks the "Next" button.</p>

## UserWay Tutorial – Install on Drupal

<https://userway.org/platforms/drupal>

<p>Select the position. You can choose among these eight positions on your site. Let's continue to step number seven, select the language.</p>	<p>Step 6 appears, and the cursor highlights some of the possible icon positions around the perimeter of a webpage layout. The cursor clicks the "Next" button, leaving the upper right (default) setting selected.</p>
<p>You can let the widget to automatically detect the language of your visitor, or if you want the widget to display in a specific language, then you can open this list and select your language.</p>	<p>Step 7 appears. The cursor highlights the "Language" field, in which contains the default text, "Auto-Detect Language." The cursor clicks the dropdown arrow in the "Language" box and a list of languages appears.</p>
<p>Let's continue. Click on "Next" to step number eight.</p>	<p>The cursor clicks out of the dropdown menu, restoring the default selection and clicks the "Next" button.</p>
<p>It's very important to make your site accessible, but it's also very important to have an accessibility statement. If you don't have one, don't worry about it, because we can help you with that. Just leave "No/I Don't Know" selected, and we'll help you with that later.</p>	<p>Step 8 appears, asking if the user's site already contains an accessibility statement. "No/I Don't Know" is the default selection. The cursor clicks the "Next" button.</p>
<p>Let's continue to step number nine. If you're interested in advanced custom options for this widget, then I recommend you to click on "I'd like to learn more" for more information.</p>	<p>The form advances to Step 9, displaying an option to learn more about a white-label or custom-branded version of the UserWay widget. The cursor clicks the "Next" button.</p>
<p>Let's scroll down to the last step.</p>	<p>The cursor scrolls down to click on the "Next" button.</p>
<p>And here's our code. So, let's click on "Copy," and I'll see you in Drupal</p>	<p>Step 10 appears, showing a window containing the UserWay script. The cursor clicks on the "Copy" button in the window's upper right corner. The code is highlighted.</p>
<p>I'm in Drupal back end. Code is copied to my clipboard. So, I'm going to show you where you have to paste this code.</p>	<p>The screen transitions to the example site's "My Drupal" management page.</p>

## UserWay Tutorial – Install on Drupal

<https://userway.org/platforms/drupal>

So, go to “Structure.” Click on “Block Layout.”	The cursor moves to the top menu bar and clicks on the “Structure” tab. A submenu appears, and the cursor clicks on the first option, “Block Layout.” That page appears.
And now, let’s click on “Custom Block Library.”	The cursor clicks on the “Custom Block Library” tab at the top of the page. The page appears.
Add a custom block.	The cursor clicks the “Add a Custom Block” button. A new window appears.
Type a block description.	The cursor types “UserWay” in the “Block Description” panel.
Change the text format from basic to full HTML.	The cursor selects “Full HTML” in the “Text Format” dropdown.
And now, click on “Source.”	The cursor clicks the “Source” button in the “Body” panel.
And you’re ready to paste the code.	The cursor pastes the code into the “Body” panel.
I’m gonna scroll down. Click on “Save.”	The cursor scrolls down the page and clicks on the “Save” button in the lower left.
Right now, the code is inside a block. So, now we have to place this block inside the footer.	The “Custom Block Library” page loads.
So, let’s go back to “Block Layout.	The cursor clicks the “Block Layout” tab. That page appears.
And I’m going to scroll all the way down to “Footer Fifth,” because I know this is the footer that my template is using.	The cursor scrolls down the page and highlights the “Footer Fifth” heading.
So, make sure you’re placing this block inside the footer that you’re using. Now let’s click on “Place Block.”	The cursor clicks the “Place Block” button next to “Footer Fifth.” The block menu appears.
And here, let’s find ours. Here it is: UserWay. Let’s click on “Place Block.”	The cursor highlights “UserWay” in the “Block” column, then clicks the “Place Block” button in the corresponding row of the “Operations” column. The “Configure Block” window appears.

## UserWay Tutorial – Install on Drupal

And here, just one more thing. Deselect “Display Title.”	The cursor unchecks the “Display Title” option under the “Title” panel displaying “UserWay.”
Click on “Save.”	The cursor clicks the “Save” button in the lower left. The “Block Layout” page returns.
And again, “Save Blocks.”	The cursor clicks the “Save Blocks” button in the lower left.
And now, let’s preview the site.	The cursor clicks “Back to Site” in the upper left. The “My Drupal” page appears.
And here’s our widget. If you can see the widget properly on your site, that means that you have installed everything correctly.	The cursor clicks the UserWay widget icon in the upper right. The “Accessibility” menu appears.
There’s another way to verify this installation. Let’s go back to userway.org and I’ll show you how to do it. You can click on “Let’s Verify” button double-check the installation. But again, if you see the widget, that means that everything’s OK.	The screen returns to the UserWay site page with the script highlighted in Step 10. The cursor highlights the “Let’s Verify” button.
So, what you can do is click on “Skip.” And here’s your accessibility statement. This is a template that we’re sharing with you. You can copy it; you can edit, add your own details, customize it as you want, and paste it on your site.	The cursor clicks the “Skip” button next to the “Let’s Verify” button. The accessibility statement appears.
If you want to learn how to install UserWay widget in other platforms like Squarespace, Webflow, WordPress, and many more, you can follow the videos that you can see on your screen right now. Visit UserWay’s YouTube channel, and in the description below this video, you’ll find a list of all the installation guides for other platforms.	The host appears in full screen, surrounded by the UserWay logo and banners linking to other tutorials.
