UserWay Tutorial – Install on Umbraco
https://userway.org/platforms/umbraco

Audio	Visual
Hi everyone. In this video, I'm going to show you how to install UserWay widget in Umbraco. You must follow all these steps to get the code snippet that you will later paste on your Umbraco site. Some steps are customization options that you can actually skip and go through them later. But in this video, I will show you all of the steps.	Woman wearing a UserWay shirt is speaking, her video is in a small box in the lower right corner of the screen. This box remains throughout the video. The main screen shows a page from the UserWay website
So, visit UserWay.org and click on "Get the Widget."	The cursor moves to the upper right corner of the UserWay website and clicks the "Get the Widget" button next to the UserWay icon. Step 1 of the code generation questionnaire appears.
Step number one is, add your website address. Also, don't forget to agree to the terms of service and privacy policy.	The example website's URL appears in the "What's your website's address?" window. The cursor clicks the "I agree" checkbox and the "Next" button.
Click on "Next" to step number two. Add your name, last name, and your email. Click on "Next" to step number three.	Step 2 of the questionnaire appears. Sample values appear in these form windows. The cursor clicks the "Next" button in the lower right corner. The form advances to the next page. The cursor clicks the "Next" button.
Select the icon that you to display. You choose among these four. Click on "Next" to step number four, where you will select the size of your button	Step 3 appears. The cursor highlights the four icon choices, leaving the first (default) option selected. The cursor clicks the "Next" button.
No matter which size you choose, mobile devices will always display the smaller size. Click on "Next" to step number 5.	Step 4 appears, showing the two icon size choices. The cursor hovers over the smaller icon, then clicks the "Next" button, leaving the larger (default) icon size selected.
Here, with this color picker, you can change the color of the icon, so it matches the design of your website. Let's click on "Next" to step number six.	Step 5 appears, showing a spectrum bar and swatch selector. The cursor clicks the "Next" button.

Select where you would like to place the button on your site. You have eight different positions. Now let's continue to step number seven.	Step 6 appears, and the cursor highlights some of the possible icon positions around the perimeter of a webpage layout. The cursor clicks the "Next" button, leaving the upper right (default) setting selected.
You can let the widget to automatically detect the language of your visitor, or you can force the widget to display in a specific language. If you like that, then open this list and select your language.	Step 7 appears. The cursor highlights the "Language" field, in which contains the default text, "Auto-Detect Language." The cursor clicks the dropdown arrow in the "Language" box and a list of languages appears.
Click on "Next" to step number eight.	The cursor clicks out of the dropdown menu, restoring the default selection and clicks the "Next" button.
You're already making your site accessible, but it's also very important to have an accessibility statement. If you don't have one, don't worry about it, because we can help you with that. Just leave "No" selected, and we'll help you with that later.	Step 8 appears, asking if the user's site already contains an accessibility statement. "No/I Don't Know" is the default selection. The cursor clicks the "Next" button.
Let's continue to step number nine. If you're interested in advanced custom options for this widget, then I recommend you to select "I'd like to learn more" for more information.	The form advances to Step 9, displaying an option to learn more about a white-label or custom-branded version of the UserWay widget. The cursor clicks the "Next" button.
Let's scroll down and click on "Next" to get our code.	The cursor scrolls down to click on the "Next" button.
Click on the "Copy" button, and I'll see you in Umbraco.	Step 10 appears, showing a window containing the UserWay script. The cursor clicks on the "Copy" button in the window's upper right corner. The code is highlighted.
I'm in Umbraco back office. Code is copied to my clipboard, and I'm going to show you where you have to paste this code.	The screen transitions to the example site's Umbraco management page.

UserWay Tutorial – Install on Umbraco

So, go to "Settings."	The cursor moves to the top menu bar and clicks on the "Settings" tab. The "Settings" window appears with a menu on the left.
Down here in "Templates," open it by clicking on the triangle on the left.	The cursor clicks on the triangle to the left of the "Templates" item in the left menu. A submenu appears.
And, click on "Master."	The cursor clicks on "Master" in the "Templates" submenu. The master code template page appears.
So, in this file, lets scroll all the way down and find the body closing tag. Here it is.	The cursor scrolls down the master template and highlights the </body> tag.
So, we're going to paste the code right on top of this body closing tag.	The cursor clicks on the line above the </body> tag.
Just paste it here and click on "Save."	The cursor pastes the code on the line and then clicks the "Save" button.
So, we're done, and let's just preview the site.	The cursor pages back to the main Umbraco back office page.
I'm going back to "Content," and click on the "Preview" button.	The cursor clicks "Content" in the top menu bar, then on the "Preview" button in the lower right corner. The example website appears.
And here's our widget. If you can see the widget on your site, that means that you have installed it correctly.	The cursor clicks the UserWay widget icon in the upper right corner. The Accessibility menu appears.
But there's another way to verify this installation. I'm going back to userway.org and show you how to do it. You can click on "Let's Verify" button to make sure that you have set up everything correctly. But again, if you see the widget on your site, that means that everything's OK.	The screen returns to the UserWay site page with the script highlighted in Step 10. The cursor highlights the "Let's Verify" button.
So, you can click on "Skip." And here's your accessibility statement. This is a template that we're sharing with you that you can copy, you can edit, you can add your own details, and bring it to your site.	The cursor clicks the "Skip" button next to the "Let's Verify" button. The accessibility statement appears.
